The Fence Post In Rollforming

Shijiazhuang Bending Machinery Equipment Technology Co., Ltd. engaged in roll forming industry for more than 20 years, challenge the new height of roll forming technology with years of experience and professional design tools, with rigorous and serious attitude to provide professional roll forming equipment for market.

Material: Galvanized Coils

Thickness: 1.0mm-1.2mm

Width: 280mm-390mm

Product roll forming connection mode: riveting with no rivet or lock seam

Shijiazhuang Bending Machinery Equipment Technology Co., Ltd.

The Fence Post In Rollforming

The fence post roll forming machine include auto-uncoiler, servo-feeding, High speed punching, welding or riveting machine, non-stop precision cutting, high precision rolls, electrical control system and other working units. Optimized configuration of each unit of the production line, machine parts are processed by CNC to ensure accuracy requirements and interchangeability. The line of electrical equipment is controlled by PLC, and the working units are related to each other for one-button operation.

Safe, reliable, low noise and smooth operation

Each unit works independently and is interconnected by PLC control

Rolls material Cr12MoV / Cr12, vacuum quenching, CNC machining

Customized special complete equipment according to different products
